

InnoCoreTM

Semi-Automatic Biopsy Device

Key Features:

- Dual Penetration Depth Options:**
 Offers selectable penetration depths of 10 mm and 20 mm, allowing flexibility to accommodate varying tissue sampling requirements.
- Integrated Safety Release Mechanism:**
 Incorporates a safety release button designed to reduce the risk of unintended or premature firing during device handling and use.
- Removable Spacer System:**
 Designed for use with disposable coaxial needles, enabling multiple tissue samples to be obtained through a single access point.
- Multi-Cut Needle Tip:**
 Features a precision-engineered cutting tip that supports smooth tissue entry while helping to minimize procedural trauma.
